SUN WOOD  
STAINER

DEVELOPED TO KEEP

## DEVELOPED TO KEEP

Planted, grown and processed in Austria. Stainer uses wood exclusively from native forests that meet strict sustainability standards, with the exception of that for special solutions. Following the motto „Developed to keep“ we reproduce matured timber, precious and tropical woods in order to preserve the rare originals. Therefore, we have made it our task to be environmentally conscious with our all products and use only sustainable production of native timber. The secret lies in our special manufacturing process, which enables a multi-level printing and coating process to apply the decors directly to the wood. We do not use film or laminate, so that the look and feel of the wood is still extant. We are thus making a sustainable contribution to environmental and species protection.
