The Best Tools for the Best Results.

For perfect planning, you need to have all the crucial information available in a clear format.

Therefore, we bundled and structured all the information and facts you need as well as useful tools and useful Information for you in this Product List.

To allow you to have the maximum benefit from the information, we will explain the structure at the beginning of this document.

Material and Form Parts Assortment

This Product List has one focal point: our entire assortment of form parts for kitchens, bathrooms and other areas (pages 12-53).

Information on Ordering and Delivery, Terms and Conditions

At the end of this document, we have summarized important information about our ordering and delivery process as well as our general delivery conditions for you (page 64). Depending on the material, please note that there may be individual differences in some aspects.

Let's talk with each other!

If you have any unanswered questions about this product list, or if you need more personal support, our team in the office and our field staff are always pleased to assist you at any time.

In this regard:

We look forward to a good partnership!

Helmut Rosskopf, Founder and CEO of Rosskopf + Partner in a conversation with an employee.

A photograph of a kitchen sink area. A person's arm is visible on the right side, reaching towards a white sink. A white cloth is draped over the left side of the sink. The countertop is light-colored with a speckled pattern. A dark wood-grain backsplash is visible behind the sink. The floor is dark grey with a herringbone pattern.

PRODUCT LIST lavanto®2016

Form Parts

SOLID SURFACE MATERIAL

The incredible possibilities of this material fascinate our customers over and over again: Homogeneous joint-free surfaces, exciting lighting effects and, especially, completely versatile thermoformability allow the designs of creative architects to become increasingly more spectacular.

COMPOSITION

Aluminium-hydroxide, high-quality acrylic and pigments

AESTHETIC FEATURES

- Gap-free joining of sheets and basins or bowls (no dirty edges, perfect hygiene)
- Invisible transitions for the impression of a massive single object
- Individually thermoformable with unchanged material properties
- Translucent: The material can be relief-milled first and then backlit for special effects.

TECHNICAL SPECIFICATIONS

- Resistant to all common household chemicals and food
- Resistant to water, dirt and moisture
- Can be repaired easily if damaged
- UV-resistant

COLOURS

- Available in 76 colours

Form Parts in the Studio Collection by request.

Notes:

Collection

The **Roskopf + Partner Collection** is particularly tuned to the requirements of our customers and are specially marked (**colour name**) in our overview. These colours are continually available in stock so that we can provide you with improved production and delivery times.

Dark and matte colours show dust and dirt more easily than light and textured colours. Therefore, they require more frequent cleaning.

Notes:

Collection

All colours are available in the specified thicknesses. **The Roskopf + Partner Collection** is particularly tuned to the requirements of our customers. These articles are specially marked (**colour name**) in our overview. These colours are always available in stock so that we can provide you improved production and delivery times.

Dark and matte colours show dust and dirt more easily than light and textured colours. Therefore they require more frequent cleaning.

* These colours are more sensitive to scratches. We recommend against using these colours for heavily used surfaces.

Sheet Material Dimensions

Raw sheet material is available in the following thicknesses and dimensions:

Snowfall/Super White:	3 mm thickness – 2464 x 1245 mm
Polaris/Super White:	6 mm thickness – 3658 x 1370 mm
	9 mm thickness – 3658 x 762 mm
	12 mm thickness – 3658 x 762/1370 mm
Ice White:	12 mm thickness – 3658 x 1370 mm
Remaining Solids/Structured:	12 mm thickness – 3658 x 762 mm
Studio Collection:	12 mm thickness – 3048 x 914 mm

In addition to the specified sheet dimensions, all colour groups can be manufactured in custom sizes. Here you have the option of ordering any sheet thickness from 3-19 mm and panel dimensions from 762 mm to 1524 mm in width and 1829 mm to 5182 mm in length. For details about special sizes, please contact your personal representative regarding delivery times and minimum quantities.

PRODUCT LIST lavanto® 2016

General Information

Delivery Conditions

DELIVERY TIMES AND CONDITIONS FOR

FORM PARTS MADE OF SOLID SURFACE MATERIAL

The production of lavanto® Form Parts commences upon receipt of orders; the shipment to be made within 3-10 business days.

Publication of this list supersedes and renders all previous Product Lists invalid. We reserve the right to correct errors and make technical amendments.

Our terms and conditions apply. You can view these on the Internet under www.rosskopf-partner.com/agb

Warranty – lavanto®

Limited Warranty

Based on the following conditions and for a period of two years, Rosskopf + Partner AG guarantees that all lavanto® products are free of defects in material and workmanship.

Warranty Conditions

The buyer is responsible for checking all goods for defects upon receipt without delay and, in any case, before further processing or assembly. Any defects are to be reported immediately. Any claims in connection with further processing or assembly procedures by the buyer or for any additional obvious defects that are not reported within 14 days of delivery cannot be considered or accepted. Defective products will be replaced immediately.

Warranty claims received by us after processing and assembly may possibly be for other causes and then attributed to lavanto® products. Additional processing and/or assembly costs, replacement costs or other costs incurred are not included in this warranty and will not be considered.

Damage caused by improper use or maintenance, in particular by ignoring the instructions for care and use of lavanto® products, is not covered by the warranty.

Instructions for Use – lavanto®

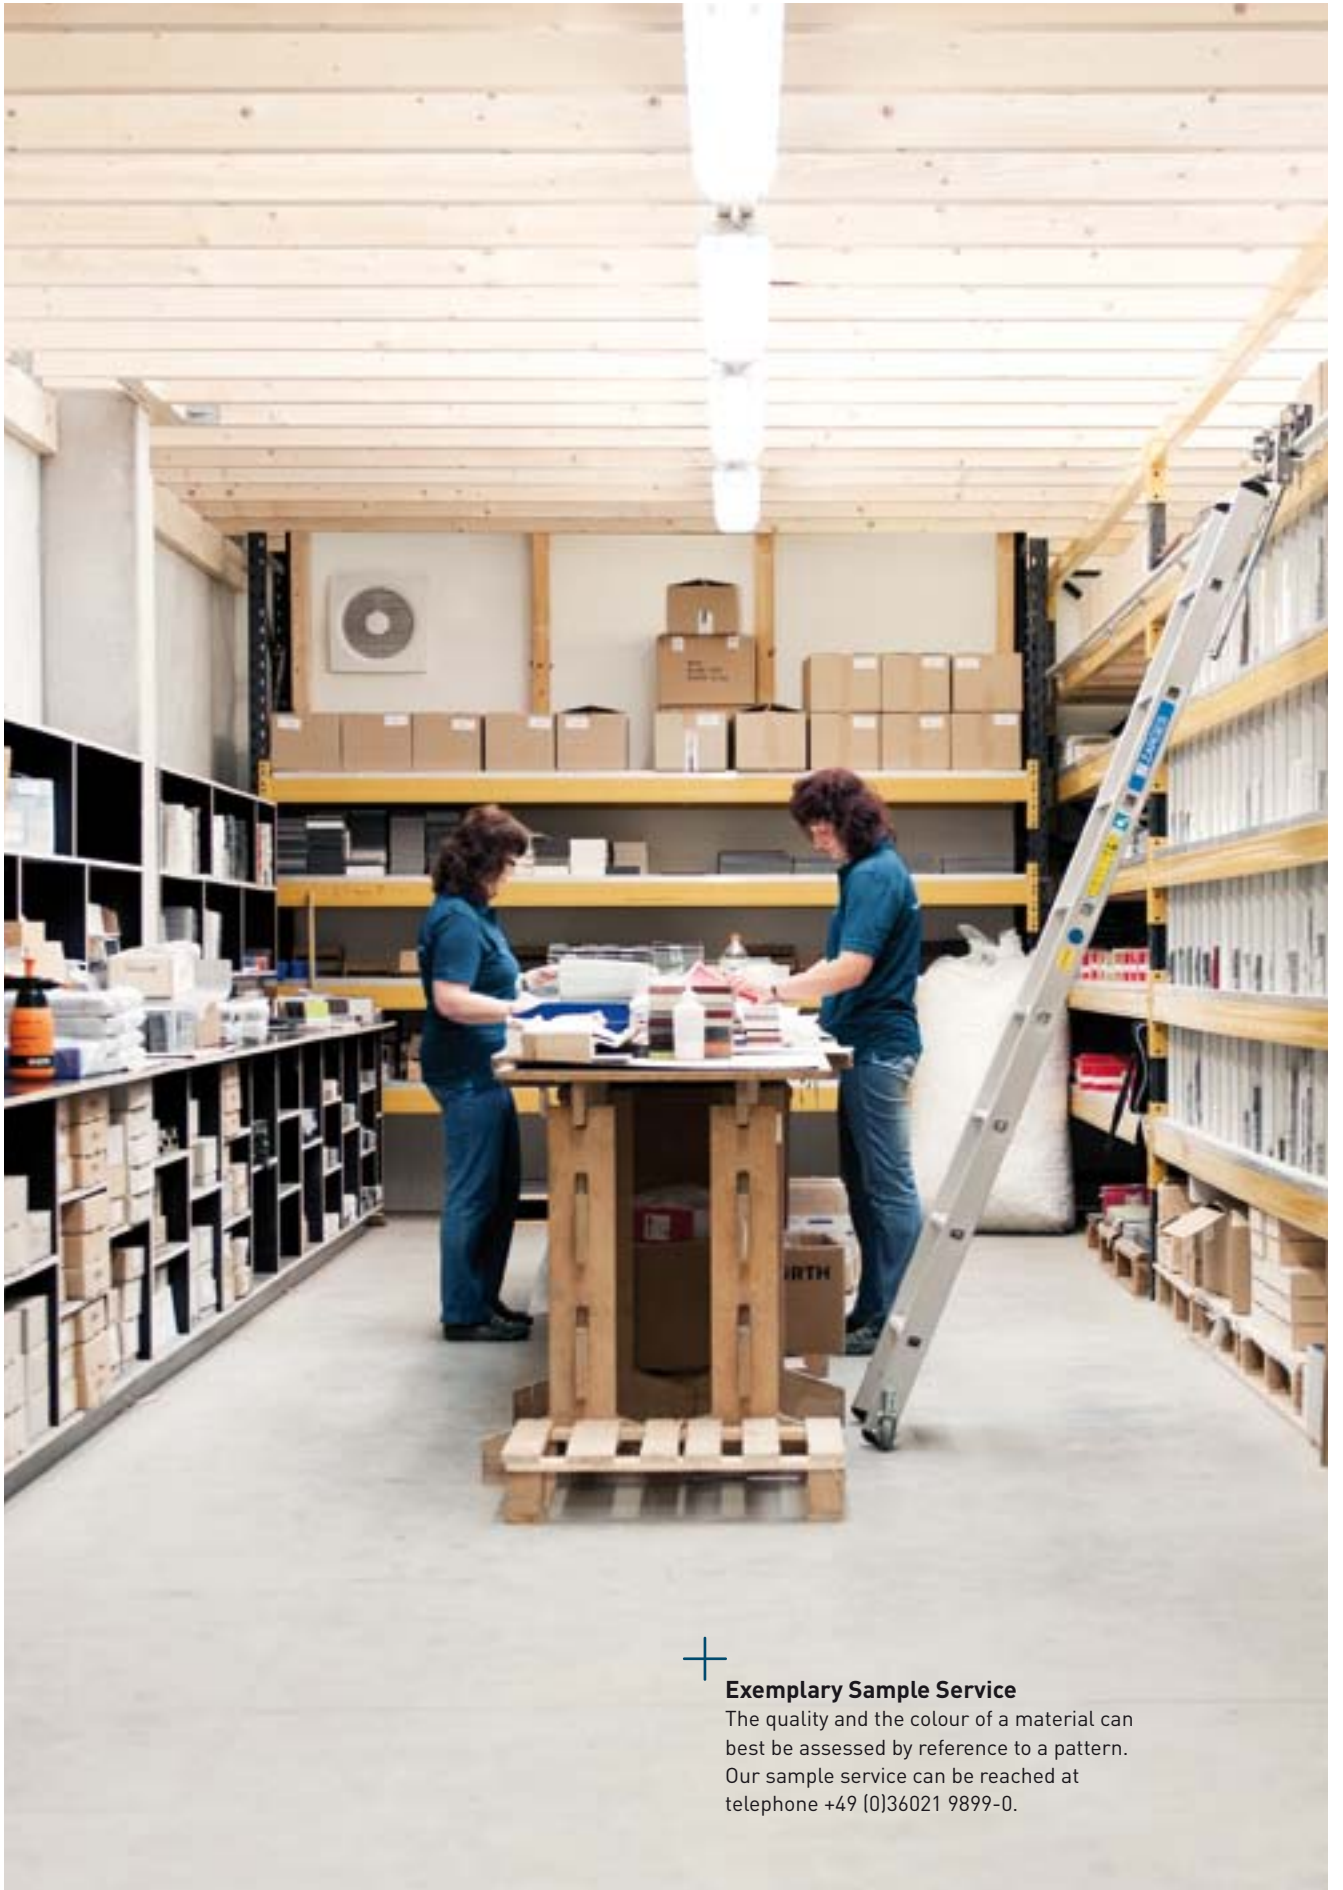

With lavanto® you have purchased a state-of-the-art product from Rosskopf + Partner. Our lavanto® series products are made of quality materials such as solid surface material; they are very easy to maintain and extremely durable.

Instructions

In order for you to permanently enjoy the products from our company, please follow these instructions:

- When you pour boiling or hot liquids into a lavanto® product, please run cold water into it at the same time.
- Do not place hot pots and pans unprotected onto the surface.
- If your lavanto® product comes into contact with bleach, please do not allow it to remain longer than 5 minutes on the surface. After removing it, we recommend that you clean the surface with general purpose cleaner and then rinse it thoroughly with clean water.
- Do not use harsh chemicals on your lavanto® product and do not forcefully attempt to remove dirt or stains from the surface.
- Rinse the surface immediately with clean water when strong staining liquids (for example, coffee, tea, red wine, etc.) or corrosive chemicals (such as acids, disinfectants with high-percentage ethanol content or colouring/hair dye) come into contact with the product.
- Prevent fire (such as burning cigarettes) from contacting your lavanto® product.
- Please understand that Rosskopf + Partner AG cannot assume responsibility in the warranty for damages caused by not observing these instructions.

For more information, see www.roskopf-partner.com

Exemplary Sample Service

The quality and the colour of a material can best be assessed by reference to a pattern.

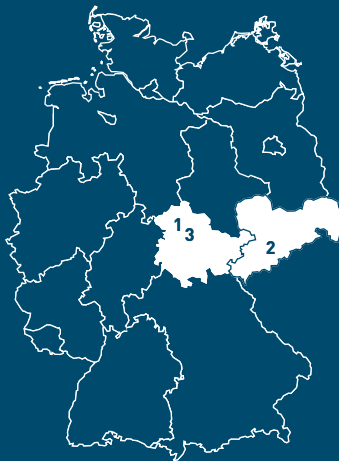

Our sample service can be reached at telephone +49 (0)36021 9899-0.
